ISDN INTERNET CONNECTION

If you cannot gain access to Broadband ADSL then ISDN service is for you. WestNet ISDN is available at 64k and 128k.

To connect to WestNet ISDN you need to convert your telephone line into an ISDN digital line. The digital line offers two 64k channels, which means that when you purchase a WestNet ISDN service you can connect to the Internet at 64k while talking on the phone on the other channel. If you wish to connect at 128k you will require a 128k WestNet ISDN account, and you will then engage both of the channels.

All connection calls to ISDN service will incur timed data call costs, however Telstra offers a \$16.50 (inc GST) Telstra ISDN Call Plan on residential lines that offers free unlimited data calls.

To request an ISDN digital line and the free data call plan please contact Telstra on 13 22 00. Please make Telstra aware that you already have an ISDN service provider.

Alternatively, you can connect with a 56k modem and get 56k speeds.
